Model PE 1500S

# Automatic Diecutting and Creasing Machine with Stripping Station

## Outstanding Features

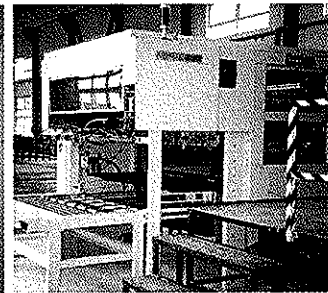

Uniquely designed friction-free non-stop bottom feeder and infeed unit, allow quick changeover from lighter weight E flute to the heavier AB flute double wall corrugated board and some heavier weight chipboard, and running printed side facing up or down with ease and free from marking.

Top quality electrical components with latest technology in micro-processors, to ensure trouble-free running and meeting CSA and UL requirements. The machine also comes equipped with the most up-to-date package to meet the ISO standards for the year 2000.

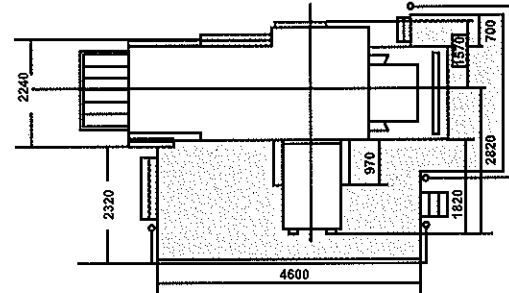

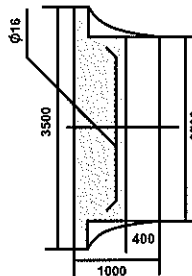

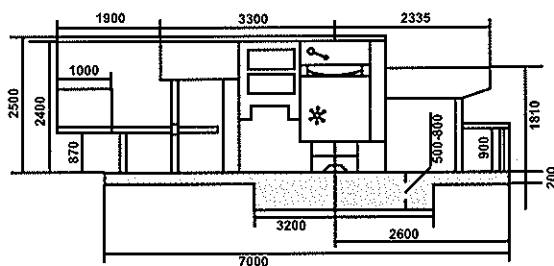

A heavy duty, triple action stripping station with the capability of stripping a variety of corrugated board at higher production speeds. This delivers a completely stripped products, except for the gripper edge, into a batch stacker. Each stack is then automatically transferred to the conveyor for bundling.
